

# FULLY AUTOMATIC PREGLUED SLEEVER

[www.tfreemantle.com](http://www.tfreemantle.com)

## FUNCTION

Product is loaded into the machines infeed conveyor either manually or automatically. The machine detects the products and selects and erects a sleeve from the sleeve magazine.

The product is then automatically loaded into the opened sleeve. The finished product is then ejected from the end of the machine wide edge leading. The fully automatic machine can be supplied complete with an integral product transfer system to accept random supply of product from the line and feed directly into the machine.

# FULLY AUTOMATIC PREGLUED SLEEVER
